1 Quick Reference Guide

This quick reference guide covers a simple emergency coffee setup for a late-night work session.

1.1 Supplies

- Coffee grounds
- Water
- Kettle or pot
- Mug
- Spoon
- Optional: sugar or creamer

1.2 Setup Steps

1. Fill the kettle with water.
2. Place it on the heat source and bring it to a boil.
3. Add coffee grounds to the mug or coffee filter.
4. Pour hot water over the grounds.
5. Steep for 3-5 minutes.
6. Remove the filter or strain the grounds.
7. Add sugar or creamer if desired.
8. Enjoy.

1.3 Quick Troubleshooting

- Too weak: use a little more coffee or steep a bit longer.
- Too strong: use less coffee or add more water.
- No heat: confirm the kettle is on and the burner is active.

1.4 Notes

Keep the kit simple: coffee, water, heat, and a mug are enough for a fast reset.
